Digital Dictation at Nostimos

Nostimos is an independent public claims adjusting office, specialized in adjusting personal injury claims. Over the last few years, Nostimos has grown to include more than 20 highly experienced personal injury specialists working in locations across the Netherlands, to become one of the country's largest personal injury specialist groups. For several months now, the entire staff has been using DigtaSoft Pro, from Grundig Business Systems, in a Windows Terminal environment. This system was fully implemented company-wide, with support from the office specialists at All Office Van den Corput of Breda.

Digital dictation: from Citrix to Hosted Windows Terminal Server

Early in 2007, Nostimos turned to All Office Van den Corput, an office-needs business in the Dutch city of Breda, for assistance in centralizing the digital communication from six Nostimos locations into one secure Citrix network.

In this way, Nostimos became the first business group in the Netherlands to invest its energy into equipping a full 60 users for work with DigtaSoft Pro. With its central equipment and administration, DigtaSoft Pro was fully installed in a single day. All authors were equipped with a Digta 415 set, and Soundboxes were provided to all the transcriptionists.

After two years of working successfully with DigtaSoft Pro, Nostimos opted to do most of its data processing through a virtual hosted server provider. As Leo in 't Groen explains: "Aiming to streamline the digital process and attain more independent workplace functionality, we decided to transfer our entire server and application management to VPO (Virtual Private Office). DigtaSoft Pro enables us to distribute our transcription work evenly and efficiently throughout our seven locations across the Netherlands. This way, we can even support our work-at-home transcriptionists, which is a plus for our company output. Instead of the Citrix network we used before, now we just need a Windows Terminal environment."

Installation

Following a 30-day test trial using DigtaSoft Pro 4.1. with VPO, Nostimos decided to install the system in the new Windows environment. Under the watchful eye of the ORDigiNAL company, thumbs-up was given for the primary installation and live environment in Almere, followed by Zwolle, Groningen, Sittard, Nimwegen and Breda. According to Gerard de Ruiter of VPO, "Following initial instructions from ORDigiNAL, we put the system to use in our WTS environment. The hardware was recognized immediately, and working with copied user files from Nostimos, the change-over worked out without a hitch." Now, Nostimos works successfully in a WTS environment with DigtaSoft Pro from Grundig Business Systems!

Die Produkte

Digta 415 Set

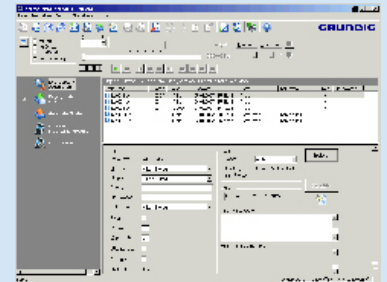

- Records in DSS format, with internal memory
- Comfortable to use; Grundig slide switch for one-hand operation
- Includes docking station and rechargeable battery for quick data transfer and recharging
