SIMPLY PROFESSIONAL DICTATION

DIGTA CORDEX WIRELESS USB DICTATION MICROPHONE

MADE IN GERMANY

Digta CordEx

Enjoy full freedom of movement during dictation!

The Digta CordEx combines all the benefits of desktop dictation with the flexibility of a mobile dictation device. The user is no longer restricted to work at the desk because of a cable connection. The extra wide four-step slide switch with intuitive operation is extremely easy to use.

Especially important for this new style of dynamic dictating: Thanks to the high capacity rechargeable battery and an optioned spare rechargeable battery the Digta CordEx allows almost unlimited dictating.

Professional qualities at a glance:

- Ergonomic design
- Colour display with indication of status and menu control
- Internal memory buffer for voice data
- No permission for radio transmission necessary (also for use in medical areas)
Please check in advance for any legal restrictions regarding radio transmission in the designated area of application. GBS can not guarantee that a permission is not necessary.
- Versatile docking station which performs as a:
 - Base transceiver station
 - USB data interface to the PC
 - Charging station (for the device and optional extra battery)
 - Foot control connection
- The PC software can be controlled via hotkeys
