

## Installation manual

### Firmwareupdate Digta CordEx

Version: V1 Bxx as at 05 Mar 2009

#### **i** Note

Do not interrupt the update process! Incomplete firmware could make the device inoperative.

#### STEP BY STEP

1. Switch on dictation microphone [1] .
2. Check firmware version in dictation microphone (see section „Settings in system menu“).
3. If a new firmware version for Digta CordEx is available online, download the corresponding file onto the PC.
4. Keep paging button [5] on docking station [2] pressed down for several seconds. Now the Digta CordEx registers itself for data transfer at the PC and is assigned with a separate drive letter.
5. Copy the new firmware file „CordEx.hex“ to the Digta CordEx drive. The dictation microphone shows the progress of the update in display [17]
6. After successful transfer, the dictation microphone is rebooted.
7. Installation of firmware update is now complete and dictation microphone is ready.
