

Digta 7

DICTATION REINVENTED

Mobile Dictation with all advantages of the newest generation

Play-back with Digta Station without Software-Installation

Digta 7 Stand-alone Kit

Digta 7 Dictation device and Transcription Station for a slim solution without PC

Grundig Business Systems presents a Dictation System operating independently of the PC – Complete package including a Digital Dictation Device and play-back accessories.

That means: no installation or integration into IT structures is required.

Simply dictate on the go – pass on the dictation device to the secretary – the dictation is directly typed from the dictation device in the Digta Station. Done.

Headphone and foot control are connected to the docking station. Thus the play-back and winding functions work as usual.

The solution allows a supreme play-back quality. Each dictation on the dictation machine can be selected individually and can be deleted when completed.

The Digta "Stand-alone Kit"
is the ideal solution in case ...

- an extended digital workflow solution is too comprehensive (and expensive) for you
- you require an autonomous dictation system which is not connected to the PC for safety reasons
- you want to use a PC-independent dictation system, for example a Mac
- you anyhow want to experience the very latest in digital dictation technology
- you want to be best equipped for the future

Your benefits of digital dictation using the Digta 7:

- Easy to use dictation device in a modern design
- Insertion and deletion of text passages
- Constantly high sound quality
- Built-in storage with 300 hours of recording time
- Up-to-date transcription without rewinding
- Very easy operation thanks to "Easy Mode" function
- More security thanks to dictation encryption and PIN function
- Shock-absorbing, handy and non-slipping soft-touch casing
- Lithium ion battery pack – rechargeable in the device and in the Digta station

The "small Digta solution" can be adapted to bigger tasks – together with a software it becomes a dictation network. Simply ask your Grundig Business Systems partner.
